

Environmental Policy

RFS Technologies, Inc. has established a customer focused environmental management system that identifies the sequence and interaction of processes and ensures that the operation and control of these processes is effective. Environmental procedures and objectives are monitored, measured, and analyzed and adequate resources are provided to ensure that the environmental systems achieve planned results and demonstrate continual improvement.

RFS Technologies, Inc. is committed to the protection of the environment by ensuring adherence to compliance obligations relating to the company's environmental aspects. We are also committed to minimizing pollution and reducing the environmental impacts of the company's activities, products, and services through continual improvement.

RFS Technologies, Inc. intends to operate in a manner that protects the environment and integrates the following principles in its management.

- Ensure that employees are properly informed and, where relevant, properly trained to conduct their activities in an environmentally responsible manner.
- Engage with local communities and authorities regarding environmental issues.
- Develop and maintain disaster plans where significant environmental risks exist.
- Develop and improve operations and technologies, taking into consideration the efficient use of energy and raw materials and giving preference to renewable resources where possible.
- Assess the environmental impact of processes before starting and before decommissioning a facility or leaving a site.
- Promote the adoption of the same principles by RFS Technologies, Inc. contractors and suppliers.
- Continually assess adherence to compliance obligations and measure environmental performance and improvement.
