Grounding Kit, Pre-formed Copper Strap, for E105

Standard Grounding Kit for Elliptical Waveguide E105 0.6m (24") grounding lead, 6 AWG (7strand) factory attched cable lug, incl. screw kit 3/8" for grounding termination

FEATURES / BENEFITS

The Standard Grounding Kit is designed to comply with RoHS (EU 2002/95/EC) and CRoHS (China SJ/T11363-2006) directives and has been verified by independent labs to withstand the damaging effects of lightning current. The pre-formed copper strap and associated hardware facilitates a proper attachment to the elliptical waveguide, insuring that the performance of the elliptical waveguide is not being compromised. The 6-gauge, 7 strand copper wire provides the most practical and effective low-inductance transfer of lightning induced current from your elliptical waveguide to your system ground.
