

4" low loss air dielectric cable; flame retardant/ halogen free jacket

FEATURES / BENEFITS

• Low Attenuation

The low attenuation of air dielectric coaxial cable results in highly efficient signal transfer in your RF system.

• Complete Shielding

The solid outer conductor of air dielectric coaxial cable creates a continuous RFI/EMI shield that minimizes system interference.

• Low VSWR

Special low VSWR versions of air dielectric coaxial cables contribute to low system noise.

• Outstanding Intermodulation Performance

Air dielectric coaxial cable's solid inner and outer conductors virtually eliminate intermods. Intermodulation performance is also confirmed with state-of-the-art equipment at the RFS Technologies factory.

• High Power Rating

Due to their low attenuation, outstanding heat transfer properties and temperature stabilized dielectric materials, air dielectric coaxial cable provides safe long term operating life at high transmit power levels.

• Wide Range of Application

Typical areas of application are: feedlines for broadcast and terrestrial microwave antennas, wireless cellular, PCS and ESMR base stations, cabling of antenna arrays, and radio equipment interconnects.
