

The protocol adapter is an integral part of the Optimizer RT® remote antenna control system. The device links the PC to the AISG antenna system and is used in coordination with RFS's NEM-ALD-A software to control antenna remote tilt motors. This device is compliant with AISG 2.0 standards, and is able to control the ACU-A20-S, ACU-A20-SR, ACU-X20-xx, and ACU-I20-xx, by providing the control signal and DC power to the connected RET. No external power supply is necessary to power the unit - simply plug it directly into an AC socket using a standard power cord to power it up. The communication with the PC is provided by a simple connection to any USB port available. **FEATURES / BENEFITS**

- Compliant with AISG 2.0 standards
- Control the ACU-A20-S, ACU-A20-SR, ACU-X20-xx, and ACU-I20-xx
- Provide the control signal and DC power to the connected RET
- External power supply not necessary plugs directly into an AC socket using a standard power cord
- Simple connection to any USB port of the PC driver provided

Technical features

GENERAL SPECIFICATIONS

Configuration Protocol Adapter, USB connection, AISG 2.0 compatible ELECTRICAL SPECIFICATIONS	Product Type	Protocol Adapter
	Configuration	Protocol Adapter, USB connection, AISG 2.0 compatible

Supply Voltage	VAC	88-284			
Delivered Voltage	V	24			
Delivered Current per Output, Max, mA	Max (mA)	1000			
Baud Rate		9600, 38400 or 115200 bauds			
MECHANICAL SPECIFICATIONS					

Connectors		Female 8 pins circular connector conforming to IEC60130-9
Techn. Application		Wireless Communication
Dimensions, H x W x D	mm (in)	116 x 60 x 30 (4.52 x 2.36 x 1.18)
